

2001 North Dakota YRBS Results Middle School – Grades 7-8

The attached information provides the statewide results for the 2001 North Dakota Youth Risk Behavior Survey (YRBS) of middle school students (grades 7-8). The results presented in this summary are “weighted” by school size and region to assure that the results accurately reflect the proportion of middle school students enrolled in “urban” and “rural” school in each Human Service Region in the state.

The enclosed information provides five tables (three pages) of results for each of the following groups of middle school students:

- All middle school students grades 7-8
- 7th grade only
- 8th grade only

Each table provides several different columns of information. The columns are as follows:

- CDC State: Includes the results for the state selected sample.
- Overall: Includes the statewide results.
- Urban: Includes the results for all schools from school districts that have 1,000 or more students enrolled in grades K-12.
- Rural: Includes the results for all schools from school districts that have fewer than 1,000 students enrolled in grades K-12.
- Region 1: Includes the results for all schools within Human Service Region 1.
- Region 2: Includes the results for all schools within Human Service Region 2.
- Region 3: Includes the results for all schools within Human Service Region 3.
- Region 4: Includes the results for all schools within Human Service Region 4.
- Region 5: Includes the results for all schools within Human Service Region 5.
- Region 6: Includes the results for all schools within Human Service Region 6.
- Region 7: Includes the results for all schools within Human Service Region 7.
- Region 8: Includes the results for all schools within Human Service Region 8.

This report is being provided to all schools. Due to the confidentiality requirements of the Health Information Disclosure Act, local YRBS results have been provided **only** to local schools that met the following criteria:

- Minimum student segment size is 25. Minimum student segment size means countable YRBS survey forms.
- For a particular school to receive a report, there must be a least 25 countable surveys (Grades 9-12) within that school.
- For additional analysis or cross-tabs by grade, gender, etc., there must be at least 25 countable surveys in each grade segment, gender segment, etc. If a grade or gender segment does not have 25 countable surveys, data can be collapsed to attain the minimum student segment size. For example, if Grade 7 had seventeen countable surveys and Grade 8 had twenty-two countable surveys, a segment that combines Grades 7-8 could be presented in a cross-tab.
- If a school does not have 25 countable surveys, the results will be reported on a regional and state level only.

If you have any questions about the enclosed information or desire additional detail, please contact Mark Winkelman from Winkelman Consulting via telephone (701-237-2283) or email (MRWinkelman@prodigy.net).
